

**Amendment 1  
to the Science ONLINE JOURNALS CONSORTIAL LICENSE AGREEMENT  
(for Subscription period 2025-2027)**

This Amendment ("Amendment"), dated December 19, 2024, is entered into by and between The American Association for the Advancement of Science ("hereinafter referred to as "Publisher") and FinELib Consortium [REDACTED]. This Amendment 1 amends the existing *Science ONLINE JOURNALS CONSORTIAL LICENSE AGREEMENT* executed December 20, 2023 between the parties (the "License"). The terms and conditions of the License will control the arrangement between the parties unless superseded by the terms and conditions expressly stated in this Amendment 1.

The parties hereby agree as follows:

1. In Section 1. DEFINITIONS, "Term" shall now be defined as follows:  
The Subscription Term and list of Licensed Materials shall be amended as follows:  
The Term of this Agreement is extended from December 20, 2024 until December 24, 2026. If the parties are in agreement, the term may be extended by 12 months to end on December 24, 2027. For Licensees who renew their subscription for the Agreement term following this one, access to the Licensed Materials shall be maintained without interruption into the start of the new term under the terms of this Agreement.
2. **Schedule 1** listing the Members shall be amended by addition of the Schedule 1 Addendum attached hereto.
3. **Schedule 3: The License Fees** shall be amended by addition of the Schedule 3 Addendum attached hereto.
4. **Schedule 5: Green Zero Day OA Pilot** shall be amended by addition of the Schedule 5 Addendum appended hereto.

Except as provided by the Amendments herein stated, all terms and conditions of the License inclusive of its Schedules shall remain in full force and effect.

### Schedule 1 Addendum

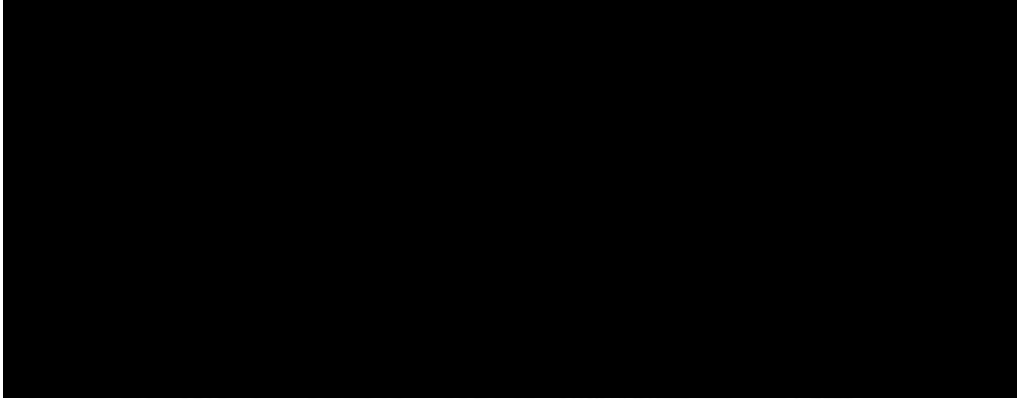

Members of the FinELib-consortium [REDACTED] for the period of the Agreement beginning 21.12.2024:

AAAS #	Institution Name
[REDACTED]	Aalto University
[REDACTED]	Abo Akademi University
[REDACTED]	Academy of Finland
[REDACTED]	Finnish Environment Institute
[REDACTED]	Finnish Medicines Agency
[REDACTED]	Finnish Meteorological Institute
[REDACTED]	Geological Survey of Finland
[REDACTED]	Jyvaskyla University
[REDACTED]	National Institute for Health and Welfare
[REDACTED]	Natural Resources Institute Finland-LUKE
[REDACTED]	Oulu University
[REDACTED]	Tampere University
[REDACTED]	Tampere University of Applied Sciences
[REDACTED]	Technical Research Centre of Finland, VTT
[REDACTED]	Turku University
[REDACTED]	University of Eastern Finland
[REDACTED]	University of Helsinki

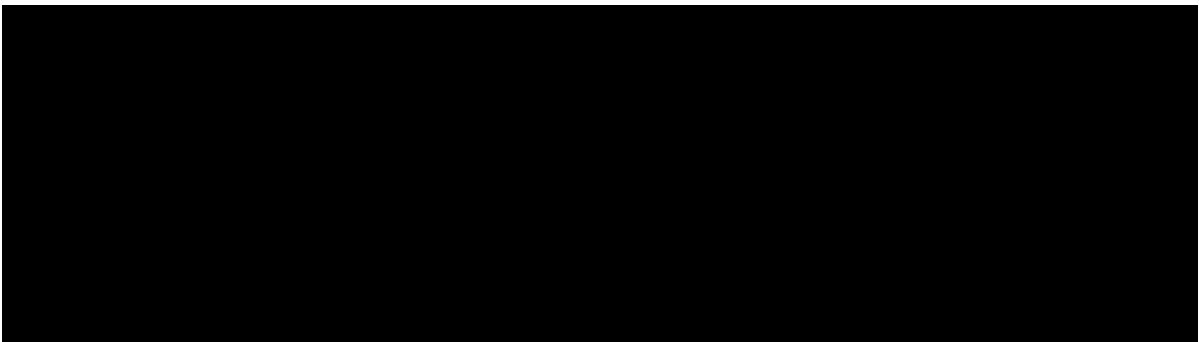

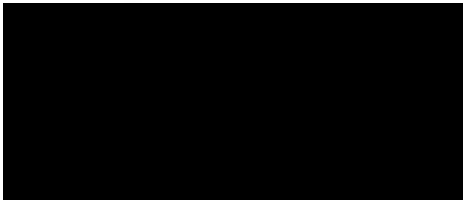

Schedule 3 Addendum

Price Quote

Rate Year	# of Institutions	Price	Overall % Change
2025	17	\$188,635.73	2.99%
2026	17	\$194,257.24	2.99%
2027	17	\$200,046.82	2.99%

## Schedule 5 Addendum

### Green Zero Day OA Pilot

#### I. Purpose

This Addendum confirms the terms of the Green Zero Day OA Pilot (“Pilot”) extension between the parties with respect to peer reviewed research articles publishing in *Science* journals and authored by the subset of Authorized Users under the License Agreement and who meet the Eligibility criteria below. During the Extended Pilot Term (see below), the National Library will communicate the details of the Pilot and the eligibility requirements to Licensees via their online author instructions page: <https://finelib.fi/open-access-publishing-in-science-journals/>.

#### II. Extended Pilot Term

This Pilot shall be extended until the earlier of either December 24, 2027 or the termination of the License Agreement, subject to the terms below. The provisions of this Pilot will be reviewed and discussed by the parties at renewal of the License Agreement.

#### III. Eligibility

The Pilot shall apply for papers where all of the following criteria are met:

- The paper is a peer-reviewed research article submitted to one of the following *Science* journals: *Science*, *Science Immunology*, *Science Robotics*, *Science Signaling*, or *Science Translational Medicine* during the Extended Pilot Term; and
- At the time of submission, the corresponding author of the paper is an Authorized User who is considered to be either a researcher or other staff (by virtue of their contract with a Licensee) or a student of a Licensee that has an active subscription license under the License Agreement; and
- The above-mentioned subscription license includes the particular *Science* journal publishing the corresponding author’s paper.

#### IV. Conditions

Where the above criteria are met, corresponding authors affiliated to a Licensee may deposit the Author Accepted Version of their peer-reviewed research to a public repository with a CC BY license at publication under the conditions identified below. The Author Accepted Version is defined as the version of the paper that is accepted for publication by Licensor including changes resulting from peer review but prior to Licensor’s copy editing and production that is not updated to resemble the final version published by Licensor.

Conditions:

- A notice must be included on the Author Accepted Version that clearly identifies it as the Author Accepted version, that includes a link to the final published version on the Licensor website, and that indicates the deposited Author Accepted version is being distributed under the CC BY license (<https://creativecommons.org/licenses/by/4.0/>).]” and
- Authors of eligible papers will still be required to sign Licensor’s License to Publish during the article submission process. Under the License to Publish, authors retain copyright in their manuscript, subject to the rights granted to AAAS. Except as otherwise stated herein, the terms of that license shall prevail with respect to the rights in and to the paper and the representation and considerations made by the authors and Licensor.

**V. Reporting**

Licensors will provide to the National Library a report of the research articles where the corresponding author is from Finland in January following each year the Pilot is in effect. National Library will identify the articles from that list that were eligible for this pilot and confirm to Licensors whether they have been self-archived and under what terms.
