- 14.1.2. Either party becomes insolvent or becomes subject to receivership, liquidation or similar external administration.
- 14.1.3. A change in control of a Licensee occurs, a Licensee merges with or acquires an organization, breaks up or if changes relevant to this Agreement occur in the Licensee's permission to organize higher level education or other legislation regarding the Licensee and relevant to this Agreement.

Notice of the termination must be given to the Licensor no later than three months prior to the end of the calendar year. The termination will become effective on 1st of January of the following year.

The Licensor is entitled to offer the terminating Licensee a revised Fee.

- 14.1.4. When the Agreement is terminated the respective Licensee's share of the Fee(s) (as defined in Schedule 4) will be deducted from the Fee(s).

14.2. For avoidance of doubt the termination as contemplated in clause 12.1. and all its consequences will only affect the Licensee (member of the FinELib consortium) in question.

14.3. On termination of this Agreement the Licensor shall refund the proportion of the Fee that represents the paid but un-expired part of the Term.

14.4. On termination of this Agreement copies of parts of the Licensed Material made by the Licensee, Authorized and/or Walk-in-Users may be retained for use as defined under Finnish copyright law. All rights and obligations of the parties automatically terminate except for those specified in clauses 14.5. and 14.6. (archival access), 12.1.-12.4. (warranty, indemnity). Access and use of the Licensed Material under

clauses 14.5. and 14.6. will be in accordance with sections 3 and 4 (permitted and prohibited uses)

- 14.5.** After termination of this Agreement for any reason each Licensee will be entitled to certain perpetual rights according to their core subscription spending in 2018. These perpetual rights will be equivalent to 15% of their 2018 core subscription spending as set out in Schedule 7. Each Licensee can choose which titles to apply the perpetual rights to, including non-core subscription titles. The titles will be valued at their 2018 prices. For example, if a member had spent €10,000 on 2018 core subscriptions, they would be entitled to choose titles for the value of up to €1,500 at the titles' 2018 prices. For journals with no 2018 prices, the earliest available price will be used.

For Licensees that have joined the agreement after 2020, the perpetual rights are based on core subscription spending in the year before joining the agreement. Perpetual rights will be equivalent to 15% of their core subscription spending as set out in Schedule 7.

- 14.6.** The perpetual access rights covers access to years 2023-2024 for the chosen titles. For example: the Licensee can choose titles for the value of €1,500. They choose one title, the 2018 price of which is €1,500. They will have perpetual access rights to years 2023-2024 for that title.

Licensor will provide perpetual access by continuing online access to the chosen titles on the Licensor's server.

For avoidance of doubt it is stated that the current Licensees' predecessors' archival rights extend to the current Licensees:

- Aalto University: Helsinki University of Technology, Helsinki School of Economics, University of Art and Design Helsinki
- Turku University incl. university hospital: Turku university incl. university hospital, Turku School of Economics.
- University of Eastern Finland incl. Kuopio university hospital: Joensuu University, Kuopio University incl. university hospital.
- Tampere University including Tampere University Hospital: University of Tampere including Tampere University Hospital

For avoidance of doubt, the perpetual access rights granted to the Licensee under the previous agreement(s) remain unaffected. For avoidance of doubt, the terms of this Agreement (including but not limited to sections 3, 4 and 6) apply to all perpetual access and use, regardless of which agreement the perpetual access falls under.

- 14.7.** Perpetual use of metadata copied/downloaded in accordance with clause 3.2.7 during the Term (and previous Terms and as applicable per Licensee) is specified in 3.2.7.

The invalidity or unenforceability of any provision of this Agreement shall not affect the continuation in force of the remainder of this Agreement.

15.11.SANCTIONS

Licensor confirms that it is currently not the subject or target of any sanctions imposed by the sanctions authority of the European Union or the United Nations and neither is any person or entity that is an owner of Licensor or otherwise has control over Licensor.

A horizontal bar chart titled 'Percentage of respondents who have been in a romantic relationship in the last 12 months, broken down by gender and age group'. The y-axis lists six age groups: 18-24, 25-34, 35-44, 45-54, 55-64, and 65+. The x-axis represents the percentage, ranging from 0 to 100. The chart compares two categories: Male (represented by blue bars) and Female (represented by orange bars). The data shows that in the 18-24 age group, approximately 95% of males and 90% of females have been in a romantic relationship. This percentage decreases as age increases, with the lowest rates observed in the 65+ age group, where approximately 45% of males and 55% of females have been in a romantic relationship.

Schedule 3 – Open Access Workflow

1. Author submits article via the standard submission process on Taylor & Francis Online.
2. Peer Review of the article:
 - a) Rejection: T&F informs Author;
 - b) Acceptance
 - Qualifying Author identified during the Term of the Agreement starting January 1st 2023 as affiliated to a Licensee (listed in Schedule A). Identification will happen at acceptance (as the manuscript enters the Production system) and will be first by Licensee email domain (as included in the list specified in Schedule 1). If the email domain is not a Licensee email domain, identification will happen by a Licensee name (as listed in Schedule 1). The identification of authors is dependent on them entering this information at submission (using the Licensee's email address and entering the Licensee's name). The Qualifying Author will be informed of the possibility to publish open access under this agreement after acceptance, via email.
 - Licensee will be informed via email each time an author is identified as a Qualifying Author. The Licensee will confirm or deny the author's status as a Qualifying Author within five (5) business days. Confirmation will count as one article towards the Publication Cap specified in Clause 7.8. If the Licensee requires more than 5 (five) business days for this, the Licensee may request an extension of up to four (4) additional business days from the Licensors by email. In case the Licensors do not receive either a confirmation or a denial within the aforementioned timeframe(s), the Licensors shall deem the author not to be a confirmed Qualifying Author and will publish the article behind a paywall. The article will be converted to open access retrospectively free of charge if the Licensee confirms the author's status as a Qualifying Author and will count towards the Publication Cap specified in Clause 7.8. as one article.
3. The aforementioned verification process takes place in the Research Dashboard. Each Licensee is able to log into their Research Dashboard account.
4. If Licensors fail to identify authors as Qualifying Authors despite the correctly provided affiliation information (Licensee name or email domain), Licensors shall be responsible for rectifying the status of the article to open access even after publication. Upon issuing the correction and rectifying the status of the article, the article shall count towards the Publication Cap. Any article publication charge Licensors may have received from the Qualifying Author or another third party, shall be returned to Qualifying Author or said third party.

Retrospective conversions: Qualifying Authors who have a) not identified themselves in the workflow or b) rejected open access publication, have the right to:

- 1) have retrospectively their article converted to open access without paying any additional fees within 90 days of publication. Such conversion of an

article from subscription to open access means the use of one article from Publication Cap.

2) to get their money back within 90 days of publication if they have paid their own APC for an article that was eligible for publication under these terms.

5. The Qualifying Author is sent an email from Licensor with a URL to the Electronic Copyright System, where they are able to select and sign the Creative Commons Licence online.
6. The Qualifying Author will not be charged for open access publishing.
7. Article is published online on Taylor & Francis Online under a CC BY licence. If a Qualifying Author wishes to publish under an alternative Creative Commons licence if offered by the journal (for example CC BY NC ND), then the Qualifying Author should contact the Licensor directly. The chosen CC-license will be clearly displayed in the article.
8. The Qualifying Author retains his/her copyright to the work.
9. This Agreement covers Qualifying Articles accepted for publication during the Term of this Agreement starting January 1st 2023. Each Qualifying Article accepted for publication counts as one article towards to Publication Cap.
10. Licensor will provide to the National Library realtime reporting on all open access articles across all Licensees as well as the total number of spent articles through the consortium view of the Research Dashboard.
11. Licensor will provide the National Library quarterly reports containing the following information regarding the Qualifying Articles per Licensee: a) name and email address of the Qualifying Author b) name of the Licensee c) funding organisation (research funder) if provided by Qualifying author d) date of acceptance of Qualifying Article e) date of publication (if available) f) journal title g) ISSN h) Qualifying Article title i) article type j) DOI k) Open Access License.

In addition, Licensor will also report quarterly to the National Library any potentially eligible articles for which the Qualifying Author has rejected open access publishing. Notwithstanding the bi-annual report and upon the request of the National Library, Licensor will provide this report in a reasonable timeframe before renegotiating the renewal of the Agreement.

12. Licensor shall deliver article metadata to Crossref. The following fields of Crossref's format shall be included:
 - publisher
 - title
 - DOI
 - member
 - type
 - accepted
 - container-title
 - volume
 - page
 - article-number
 - published-print
 - published-online

- ISSN
- license (incl. content-version "vor")
- author (incl. ORCID if applicable and affiliation)

13. The Licensor agrees to work with appointed representatives of the National Library to discuss, agree and make any agreed improvements to the workflow and the functionality of the Research Dashboard

14. The Licensor shall improve the way eligible articles are displayed to the Licensee in the Research Dashboard. Only articles eligible under the agreement will be displayed to the Licensee. Later in 2023, further improvements will make it clearer to the Licensee, by displaying eligible articles in one tab, which articles require approval under the agreement.
