Schedule E: Open Access Publishing

The Subscribers (i.e., FinELIB Consortium members) will be granted collectively (i.e., across all members) the following number of article publication charge (APC) allowances in 2025 and 2026 for publication of Eligible Articles (as defined below) in LWW's hybrid and gold Open Access journals included in the LWW Total Access Collection (the "Included Journals", a current list of which is set forth in Schedule C) as follows:

- In 2025, 103 open access APC allowances for Eligible Articles accepted in such year for publication in one of the Included Journals.
- In 2026 103 open access APC allowances for Eligible Articles accepted in such year for publication in one of the Included Journals.
- In the Optional year 2027, 103 open access APC allowances for Eligible Articles accepted in such year for publication in one of the Included Journals.

The open access APC allowances must be used in the calendar year of the subscription. If in 2025 the total number of APC allowances is exhausted, up to 10% (up to 11) of the following year's APC allowances may be used in 2025. In November 2025, if the Subscriber requests via the National Library, Ovid and the National Library acting on behalf of the Subscriber will evaluate the use of the APC allowances, and the National Library will advise Ovid in writing if it wishes to bring forward 2026 APC allowances into the 2025 contract period. If the Term is extended via an Optional Year as defined in Section 9 above: If in 2026 the total number of APC allowances is exhausted, up to 10% (up to 11) of the following year's APC allowances may be used in 2026. In November 2026, if the Subscriber requests via the National Library, Ovid and the National Library acting on behalf of the Subscriber will evaluate the use of the APC allowances, and the National Library will advise Ovid in writing if it wishes to bring forward 2027 APC allowances into the 2026 contract period. Unused APC allowances do not carry over to the next year.

By January 31 of each year during the Term, Ovid will provide to the National Library acting on behalf of the Subscriber an updated list of the Included Journals. If a hybrid journal that is also an Included Journal converts to fully gold open access during the Term, such journal will remain an Included Journal under this Agreement. New fully gold open access journals launched by Ovid are automatically added to the Included Journals.

Ovid will require its Affiliate to provide online system for Subscribers to approve or deny the Corresponding Authors' eligibility, and to otherwise meet the publisher obligations set out in this paragraph. Subscriber must confirm or deny that the Corresponding Author is an Affiliated Author within 3 business days following notification. In case Ovid or its affiliate, as applicable does not receive either a confirmation or a denial through the aforementioned online system within 3 business days after Ovid or its affiliate as applicable has notified the applicable Subscriber, Ovid or its affiliate as applicable will send a reminder, which shall inform Subscriber that Ovid or its affiliate will deem the author to be an Affiliated Author and continue the publication if the Subscriber does not respond within 4 days of the date of such reminder. The Subscriber may, if the Subscriber cannot verify that the author is an Affiliated Author for material reasons, request a reasonable extension of the grace period, but not more than 5 business days from the date of the initial notification of eligibility. If the Subscriber does not deny that the Corresponding Author is an Affiliated Author by the end of the 4-day period (or, if a grace period is extended, by the end of the grace period), the publisher may deem the Corresponding Author to be an Affiliated Author.

Once the Corresponding Author's eligibility has been validated or the Corresponding Author is deemed to be an Affiliated Author in accordance with the foregoing, if any APC Allowances remain available for the applicable period, one (1) APC Allowance will be considered used.

Eligible Articles shall be published under a Creative Commons license provided the Corresponding author completes the Publisher's License to Publish agreement. The license types currently offered by each Included Journal are listed in Attachment 1 to this Schedule E but are subject to change in each such journals' discretion.

If more than ten percent (10%) of the Included journals currently offer a CC BY license as specified in Attachment 1 to this Schedule E cease doing so,

	<p>Ovid will use reasonable efforts to promptly inform the National Library of Finland.</p> <p>Ovid will, and will require its affiliate to disclose on their following pages, respectively, https://tools.ovid.com/openaccess/finelib/) and https://www.wolterskluwer.com/en/solutions/lippincott-journals/lippincott-open-access/partner/institutions#Finland) (or successor webpages) the National Library’s preference for the CC BY license. If a Corresponding Author chooses CC BY-NC-ND for an article in an Included Journal that also offers CC BY, Ovid will, upon request of the Corresponding Author, permit the Corresponding Author to change the license to CC-BY (which may be subject to the Corresponding Author’s signing a new license agreement and/or amendment) provided such request is received no more than 90 days after the article publication date. The conversion of the license for which an APC allowance was used hereunder is not considered use of a second APC allowance from the totals set out above.</p> <p>Authors retain copyright to their articles if they choose to publish under a Creative Commons License and sign the publisher’s License to Publish agreement.</p> <p>If the Subscriber timely denies the request for an APC allowance, or none remain available for the applicable period, for an Article through this Agreement, the publisher or its affiliate may offer such author the opportunity to pay the applicable APC or to publish under subscription terms.</p> <p>Corresponding Author(s) that have not identified themselves as affiliated to a Subscriber or have not selected open access prior to publication shall have a 365-day window after publication of the article to so identify such affiliation and convert to Open Access under this Agreement (which shall be subject to execution of appropriate Open Access License Agreements within such period). The conversion may also be done before publication of the article. Once the Corresponding Author’s eligibility has been validated by Subscriber or the Corresponding Author has been deemed an Affiliated Author in accordance herewith, one (1) APC Allowance will be considered used, if any are remaining for the applicable period.</p> <p>Eligible Authors who have erroneously paid their own APC for an article accepted for publication in an Included Journal during the Term will be entitled to request a refund of the relevant APC. Such request must be received by Ovid within 365 days of publication. A refund will only be provided if any APC Allowances are available for the applicable period, and if a refund is provided, one APC Allowance will be considered used. If the number of APC Allowances has been depleted at the time the Ovid will offer the author the option of self-funding the APC or to publish the article via the traditional route as a subscription article (not open access).</p> <p>The final published article will be made openly available at the time of online publication.</p> <p>The parties acknowledge the importance of a fluent workflow. Ovid and the National Library will review the workflow as set forth above on a regular basis during the duration of the Agreement.</p>
<p>Reporting</p>	<p>Within 30 days from the end of each calendar quarter during the Term, Ovid will deliver to the National Library acting on behalf of the Subscribers the following two (2) reports in a machine-readable format:</p>

	<p>1. A report listing, separately for each Subscriber, articles published in the Included Journals in such calendar quarter from Corresponding Authors that reported affiliation with the Subscriber (whether or not the Corresponding Author selected Open Access). This report shall be provided in Excel and shall include the following details:</p> <ul style="list-style-type: none"> • Name and e-mail address of the Corresponding Author (as provided by the author) • Corresponding Author’s affiliation (as provided by the author) • Publication month and year • Journal Title • Journal online ISSN • Article title • Article type (if applicable) • DOI (if available) • Open access designations (Not OA / Hybrid OA / gold OA) <p>2.
